Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103[©] and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1, 3-16 and 18 stand rejected under 35 U.S.C. § 103 as being unpatentable over Evans et al. (17 on the IDS), in view of Yamashiro et al. (49 on the IDS), all of record for reasons set forth in Paper No. 10.

Applicant's arguments set forth in Paper No. 11 have been fully considered but are not found persuasive.

Applicant argues that Yamashiro et al., teaches away from the claimed invention because Yamashiro et al., demonstrates that the effect of PEG on a particular biological response in porcine thyroid cells does not correlate with a similar biological response in Evans et al.'s CHO-RLUC cells. The Examiner after reviewing the Yamashiro et al., reference found no such teaching.

Applicant argues that Yamashiro et al., teaches their PEG induced effect was limited to TSAB and did not extend to bTSH, while Applicant's specification clearly teaches said PEG inducing effect extended to bTSH.

The bTSH limitations are not claimed.

Applicant argues there was no expectation of success in

creating Applicant's claimed invention, since going from Yamashiro's PTC cells to Evan's CHO-Rluc cells would not be expected to work.

However, Attorney's argument does replace evidence is required, see MPEP 2145.

Furthermore, Yamashiro's PTC cells and Evan's CHO-Rluc cells are similar in that they both express the TSH receptor, the PTC cells do it naturally while the CHO-Rluc cells do it recombinantly. Furthermore Yamashiro teaches the PEG induced effect was specific to TSAB, thereby demonstrating that PEG induced an effect specific between TSAB and the TSH receptor. Since Evans et al.'s, assay teaches both the TSAB and the TSH receptor, there is a reasonable expectation of success that using PEG would induce similar effects as those taught by Yamashiro et al.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.
